

Innovative Functional Cosmetic Materials and Technology Forum

Cosmetic industries and consumer awareness are continuously growing. Product specialization strategy and market trend analysis are getting more and more important for entrepreneurs who want to enter the cosmetic market. Many companies develop unique materials to add superior value to their own products. Therefore, BPIPO has invited several innovative biotech companies from Taiwan and ASEAN countries to share their unique functional cosmetic materials and technologies. This forum aims to bring together innovative entrepreneurs, researchers, and potential collaborative partners to share their experience and expertise, and it is hoped that these bilateral knowledge exchanges will deepen biotech collaboration and enhance R&D synergies in cosmetics for both Taiwan and participating ASEAN countries.

Organizer: Biotechnology and Pharmaceutical Industries Promotion Office (BPIPO)

Development Center for Biotechnology (DCB)

Mode: Virtual forum (The link will be sent by September 28)

Registration link: <http://60.250.130.23/news/1100907E/>

Date: Thursday, October 7, 2021
